# LAND LOVERS

Want to find the perfect piece of property to build your log home? Take your land hunt to these great resources:

**www.eaglestar.net** Maintains a directory of land options from wilderness seclusion to resort living, and features hot new properties across the United States.

**www.landauction.com** This site bills itself as “America’s liquidator of affordable land.” It lists upcoming property auctions and has an e-mail notification feature that will inform you when auctions are being held in your area of interest.

**www.landwatch.com** A site devoted to rural real estate, particularly in the southeast and Gulf states.

**www.unitedcountry.com** Lets you conduct nationwide searches as well as state-by-state and geographic region.

**www.landandfarm.com** This rural-property bulletin enables you to search by your own parameters, but also breaks down offerings into specific genres, such as natural forests, recreational property and undeveloped land. Also searchable by state. A bevy of other ancillary features makes it a great tool.
